

Valentina Infante

Gas Midstream, Energy Management & Optimization

Valentina Infante was born in Milan on 30 June 1968. She holds a degree in Engineering, a master in Economics and Management of Energy and Environment, the EDF Corporate University Advance Management Program certification and A RINA certification as Temporary Manager.

In Edison she is currently in charge of the development of the Small Scale LNG Business, a new business opportunity related to the use of LNG as alternative fuel in maritime and road transport, for off-grid industrial customers and for methanization of isolated areas.

She has been working for Edison since 1997 holding many different positions within the gas sector of the group and participating to the development of the new rules for the gas market deregulation and Edison gas market positioning.

From 2008 to 2013, she was the General Manager and board member of Edison Stoccaggio S.p.A. (Edison's unbundled gas storage company) and member of the Gas monitoring and Emergency National Committee. After this experience, she was seconded in South Stream Transport BV as Head of Business Management.

Valentina currently is Head of Small Scale LNG Business Department
