EUROPEAN
BIOMETHANE MAP
INFRASTRUCTURE FOR BIOMETHANE PRODUCTION
2020

Gas Infrastructure Europe (GIE)
Avenue de Cortenbergh 100
1000 Brussels - BELGIUM
T +32 2 209 05 00
gie@gie.eu
www.gie.eu
@GIEBrussels

Gas Infrastructure Europe (GIE) is the association representing the sole interest of the infrastructure industry in the natural gas business such as Transmission System Operators, Storage System Operators and LNG Terminal Operators. GIE has currently 69 members in 26 European countries.

European Biogas Association (EBA)
Rue d'Arlon 63-65
1040 Brussels - BELGIUM
T +32 2 400 10 89
info@europeanbiogas.eu
www.europeanbiogas.eu
@European_Biogas

European Biogas Association (EBA) is the voice of renewable gas in Europe since 2009. EBA advocates the recognition of biomethane and other renewable gases as sustainable, on demand and flexible energy sources that provide multiple knock-on socio-economic and environmental benefits. Supported by its members, EBA is committed to work with European institutions, industry, agricultural partners, NGOs and academia to develop policies which can enable the large-scale deployment of renewable gases and organic fertilisers throughout Europe, supported by transparent, wellestablished sustainability certification bodies to ensure that sustainability remains at the core of the industry. The association counts today on a well-established network of over 100 national organisations, scientific institutes and companies from Europe and beyond.

BIOMETHANE DATA LEGEND

Facility number
000 Plant injecting into / connected to the grid
000 Plant not injecting into / connected to the grid
Location of biomethane production facility
Start of operation

AT-1	Asten / Linz	D	H	NO	450	SWW	PHS	2010

Grid connection type
- T Transport grid
- D Distribution grid
- ☒ No connection

Type of gas of the grid
- H H-gas
- L L-gas

Physical production at the plant
- CNG Bio-CNG
- LNG Bio-LNG
- NO None

450 Biomethane Production Capacity [m³/h]

SWW Main substrates used

PHS Upgrading process

Main substrate use / feedstock type
- AGR Agricultural Residues, Manure, Plant Residues
  - All substrates related to agricultural production except for energy crops. This includes manure, straw, cover/catch crops and crop residues
- ENC Energy Crops
  - Primary crops with high starch content
- FAB Industrial Organic Waste from Food and Beverage Industries
  - Industrial organic waste for example from food and beverage industry
- SGW Sewage Sludge and Waste
  - Sludge produced at a wastewater treatment plant
- MSW Bio- and Municipal Waste
  - Municipal and organic household waste
- LAN Landfill
  - Organic waste producing biogas collected on landfill, sometimes referred to as 'landfill gas' in literature
- - No Information

Upgrading process (multiple methods can be used or combined)
- CHS Chemical Scrubbing
- CRY Cryogenic Separation
- MEM Membrane Separation
- PHS Physical Scrubbing
- PSA Pressure Swing Adsorption
- WAS Water Scrubbing
- - No Information

MAP LEGEND

- 🟩 European country producing biomethane
- ▨ Not producing biomethane / no data available

Cross-border / interconnection points
- ○ operational
- ○ planned

Intra-country or intra balancing zone point
Cross-border interconnection point

Transport by pipeline
- under 24"
- 24" to 36"
- 36" and over
- project

Gas Reserve areas
- ▲ drilling platform
- gas field

DATA SOURCES

All data provided on this map is for information purposes and shall be treated as indicative only. Under no circumstances shall it be regarded as data intended for commercial use.
We appreciate the support of our members and colleagues who have kindly provided the necessary data. Sources for each country are listed below.
Data covers 18 European countries - the status the data represents is indicated below.
Data is covering active facilities only - many more are planned or under construction.
More current information on biogas can be found on the EBA website at www.europeanbiogas.eu
Additional information is available in the EBA Statistical Report 2019.

EBA ASSOCIATE MEMBERS

The European biomethane market

Europe comprised 18,202 biogas plants in end 2018, with all EU28 countries active in the field (except Malta), along with Iceland, Norway, Serbia and Switzerland. Compared to the biogas sector, biomethane is still in its infancy. Biomethane plants upgrade the raw biogas production to a virtually pure stream of methane, which can then be injected into the local gas grid or used locally for heating and fueling purposes. In 2018, 3 more countries joined the list of biomethane producers in Europe, namely Belgium (1 plant), Estonia (2 plants) and Ireland (1 plant). This brough the total number of European biomethane-producing countries to 18.

Whereas growth in the biogas market has levelled out slightly in recent years, the biomethane market continues to develop at an impressive rate, with 13% increase in new installations over the course of 2018. By the end of 2018, there were 610 active biomethane-producing plants in Europe, of which as many as 70 were new plants. A total of 22,787 GWh of biomethane or 2.28 bcm was produced in 2018.
